PROFESSIONAL SUMMARY

MCA student at the National Institute of Technology Agartala with a strong foundation in Data Structures and Algorithms, Object-Oriented Programming, and Software Engineering. Proficient in Java, JavaScript, React.js, Node.js, Express.js, and SQL. Solved 500+ Data Structures and Algorithms problems on LeetCode with a contest rating of 1550+. Experienced in developing full-stack web applications, designing RESTful APIs, implementing secure authentication and authorization, and managing database operations using MongoDB and MySQL.

EDUCATION

National Institute of Technology Agartala — Agartala, Tripura
Master of Computer Applications (MCA) – CGPA: 9.37 — 2025 – 2028

Dev Bhoomi Uttarakhand University — Dehradun, Uttarakhand
Bachelor of Computer Applications (BCA) – CGPA: 9.31 — 2021 – 2024

Rajeev Gandhi Navodaya Vidyalaya — Almora, Uttarakhand
Senior Secondary (XII) – Percentage: 74.2% — 2019 – 2020

TECHNICAL PROJECTS

RideMate – Ride Coordination Platform
React.js, Node.js, Express.js, MongoDB, JavaScript

- Developed a full-stack ride coordination platform connecting travelers heading towards common destinations, enabling users to create rides, discover available rides, and submit seat booking requests.
- Designed and implemented RESTful APIs for user authentication, ride management, join requests, notifications, user profiles, and reviews using Node.js and Express.js.
- Implemented secure cookie-based JWT authentication, protected routes, and role-based authorization to enforce access control for ride owners and travelers.
- Developed booking workflows with seat availability validation, request approval and rejection, ride cancellation, and automated ride status management.
- Implemented database operations and review workflows using MongoDB, including controlled review visibility and ride lifecycle management.

Full-Stack Property Listing Platform
Node.js, Express.js, EJS, MongoDB Atlas, Cloudinary, JavaScript

- Developed and deployed a full-stack property rental application supporting complete CRUD functionality for listings and user reviews.
- Implemented secure user authentication and role-based authorization rules to ensure only property owners can modify listings, and review deletion rights are strictly restricted to the review's author.
- Integrated Cloudinary API for production media asset hosting alongside MongoDB Atlas for cloud database persistence.
- Structured modular Express REST routes, middleware error handling, and server-side view rendering using EJS templates.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL, HTML, CSS, Python

Frameworks and Web Technologies: React.js, Node.js, Express.js, EJS, RESTful APIs

Databases and Cloud Services: MongoDB, MongoDB Atlas, MySQL, Cloudinary API

Core Computer Science: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks

Developer Tools and Hosting: Git, GitHub, VS Code, Postman, Vercel, Render

ACHIEVEMENTS & CERTIFICATIONS

- **LeetCode:** Solved 500+ Data Structures and Algorithms problems with a contest rating of 1550+.
- **CodeChef:** Achieved a contest rating of 1304.
- **NASSCOM:** Gold Python Certification, 2024.
